I. About Enolsoft PDF Creator

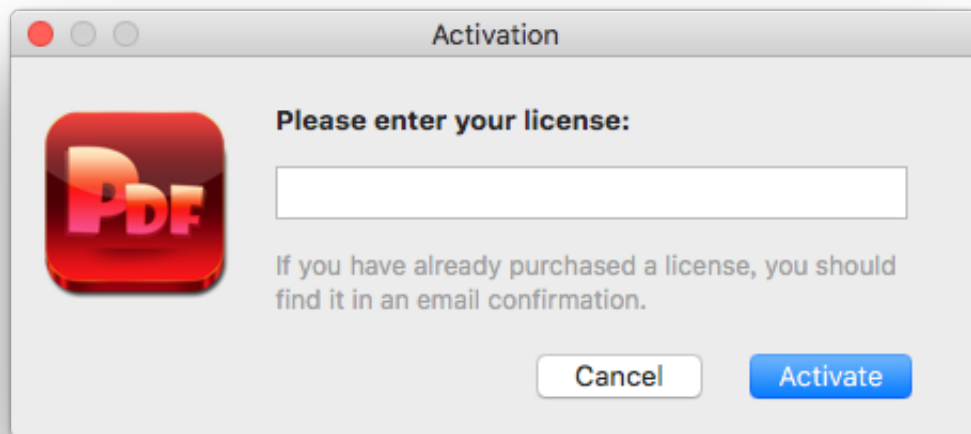

Enolsoft PDF Creator allows you to create standard PDF from many file types, compress the quality of PDF, and encrypt PDF.

II. Product Activation

Enolsoft PDF Creator is available on our official website, you can download it at <https://www.enolsoft.com/download/enolsoft-pdf-creator.dmg>. You can double click the dmg file (disk image), and then move the app to Applications folder.

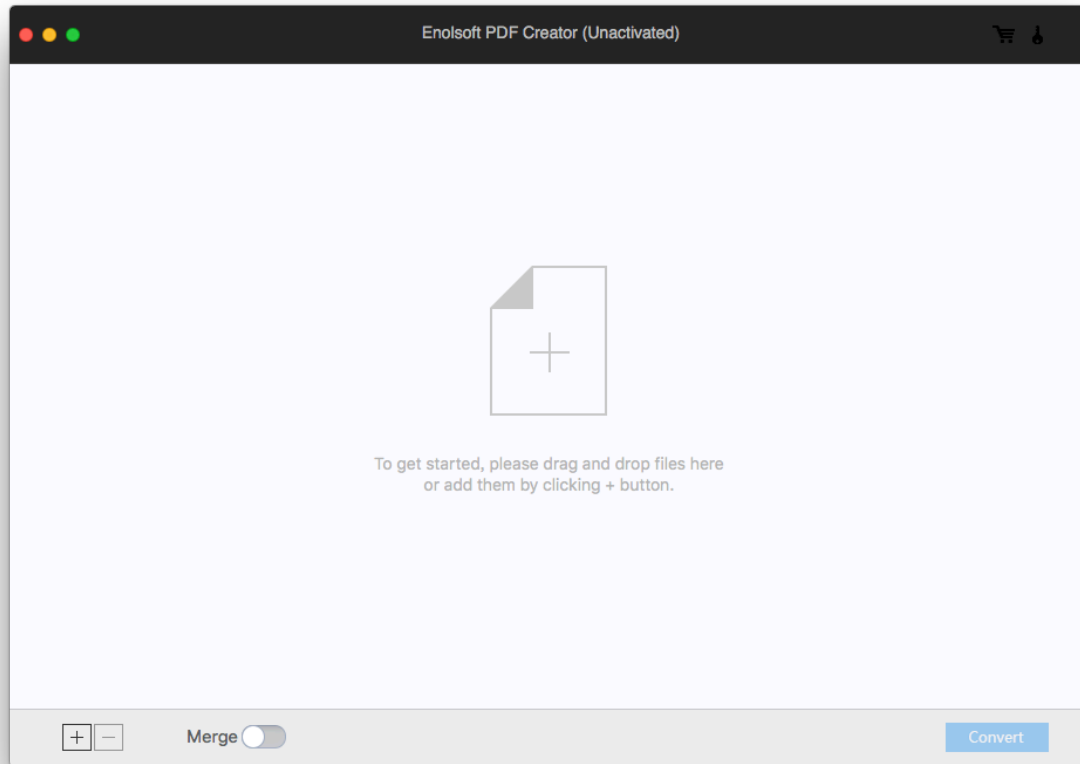

Activating Enolsoft PDF Creator is a fairly easy task. You just need to launch the app first, tap on the “Help” on the menu bar, and select the “Activate Enolsoft PDF Creator” from the Help menu. Once the activation window shows on the screen, you have to copy-n-paste your registration code into the “Key Code” box, and then click “Activate” button to confirm everything.

Notice: *If you buy the app from Mac App Store, you don't need to activate the app.*

III. Application Operating

i. Add & Clear PDF

To add PDF files to Enolsoft PDF Creator:

1. Drag-n-drop PDF files to main interface directly.
2. Click File > Add files... on menu bar, and then select files in the window that appears.
3. Click File > Add Recent on menu bar, and then choose the file you have worked with recently from the submenu.

4. Click  button, then select files from the pop-up window.

To clear PDF files from Enolsoft PDF Creator:

1. Highlight one or more files by command click, and then click .

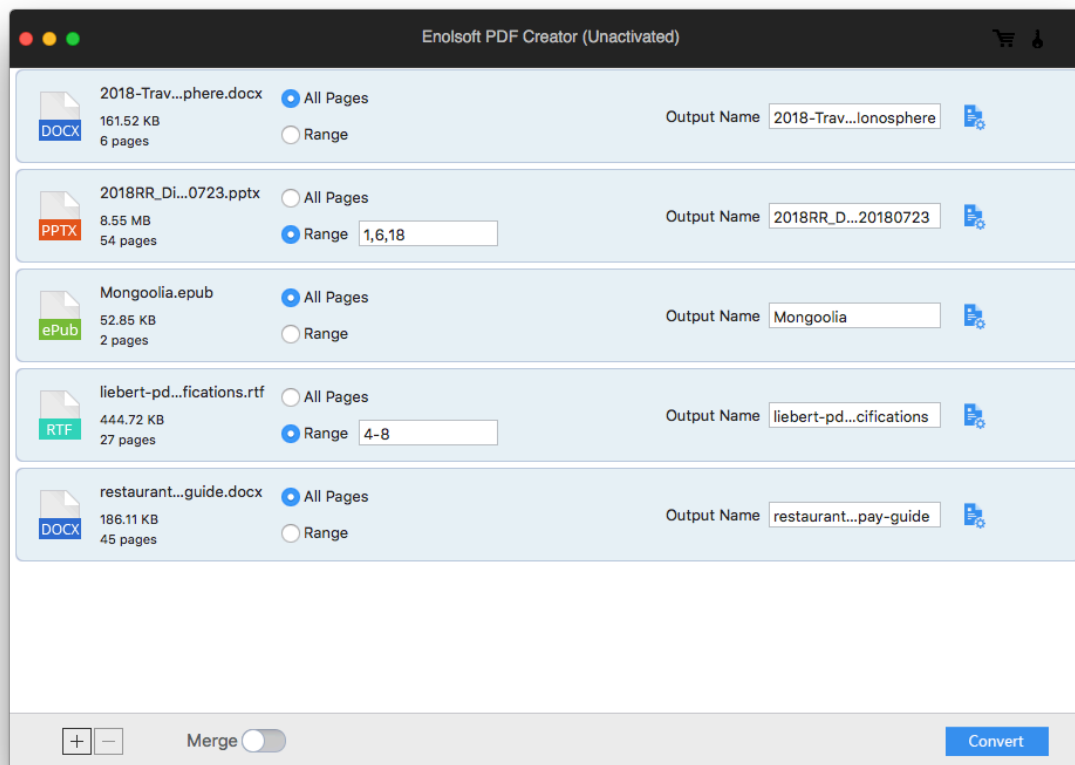

2. Click File > Clear All on menu bar to clear all PDF files.
3. Click File > Clear Finished Items on menu bar to clear all finished items, including both successful and failed items.

ii. Preview PDF

Click the format icon to preview the added file.

iii. Page Range Settings

The app provides 2 options enabling you to convert all pages or specific pages of the file you loaded (images excluded). To convert all pages of a file, you can select All Pages. If you just want to select specific pages range to convert, you can choose Range option. A blank will show up and allow you to enter the page ranges. For example, to convert 1 to 5 pages, you can enter 1-5 in the blank. To convert page 2, page 4 to page 100, you can enter 2,4-100. If you want to convert other pages range in the file after conversion is complete, you can reset the pages range and then start conversion again.

iv. File Format Supported

The program is able to convert multiple formats (*.docx, *.pptx, *.txt, *.rtf(d), *.epub, *.html, *.htm, *.chm, *.jpeg, *.jpg, *.jp2, *.bmp, *.png, *.gif, *.ico, *.tga, *.tif and *.tiff.) to PDF format.

v. Merge Multiple Files

To convert multiple files to a PDF file, imported them, click the Merge button, and then click the Convert button.

vi. Password Protect PDF

To give PDF a password:

1. Click  button next to the format button.
2. Type a password, and then retype it to verify the password.

A dialog box with the following fields: Password: (text input, highlighted with a red border), Verify: (text input), Page Size: (dropdown menu, set to Original), Quality: (dropdown menu, set to Original), Cancel (button), and OK (button).

vii. Page Size

To select page size, click the Page Size button.

A dialog box with the following fields: Password: (text input), Verify: (text input), Page Size: (dropdown menu, set to Original, highlighted with a red border), Quality: (dropdown menu, set to Original), Cancel (button), and OK (button).
